Black, Michael. *Poetic Drama as Mirror of the Will*. London, Vision, 1977: "The central achievement of this drama is to give direct access to the inner nature, the will or basic self, of the main characters. The poetry of this self-expression is not a medium or vehicle of ready-made ideas; it is a direct access to the mind in action, where the imagery, tone and rhythm work below the conceptual or discursive level."

Ricks, Christopher. T S Eliot and Prejudice. London, Faber and Faber, 1990: The author argues that the curious grammar of Eliot holds together a proposition and its opposite in a profound equilibrium, effectively providing a wisdom which sees all points of view at the same time. This kind of poetry is thus the guardian of irony, curiosity and hesitation against the blandishments of dogma and prejudice. Thought is thus kept healthy and vigilant -- a remedy against the petrification of conservatism and the simplification of the left.

Trevelyan, George and Matchett, Edward. *Twelve Seats and the Round Table*. Jersey, Neveille Spearman, 1976

Trevelyan, George. *Magic Casements; the use of poetry in the expanding of consciousness*. London, Coventure, 1983. For him: "poetry rightly used and rethought can become an instrument for awakening the atrophied organs of perception of the invisible worlds, the '...magic casements opening on the foam of perilous seas and faery lands forlorn'."

Trigg, Stephanie (University of Melbourne) argues that the "emphasis on transcendent experience has not always served poetry well, in terms of its teachability. If the essence of poetry is always to point to something invisible, how difficult it seems to translate these metaphysics into the classroom discourses of information, research and assessment. How impossible it is, after all, to summarise a poem's meaning, if poetry is that form in which words, or signifiers, find their richest sites of play, only to defer meaning, somewhere beyond the page."

United Nations Research Institute for Social Development: "Whilst 'qualitative' is often used in the social sciences in opposition to 'quantitative', it is not so understood in this project. In accordance with Economic and Social Council Resolution 1989/4, the concern here is with 'numerical indicative objectives' and 'the adequate level of satisfaction of basic economic and

socio-cultural needs in regard to food, housing, clothing, education, health care and necessary social services'. Typical qualitative indicators are here taken to be indicators that give the percentage of the population...having or not having a defined quality, such as literacy, or meeting or not meeting a given standard of adequacy with regard to some condition of living such as food consumption." (E/CN.3/1991/21, pp 5-6)
